

# MELISSA IGLUNA 2020

How MELISSA POMP's spent the last year creating a circular future

MELISSA

# IGLUNA 2020 – space habitat with remote operations

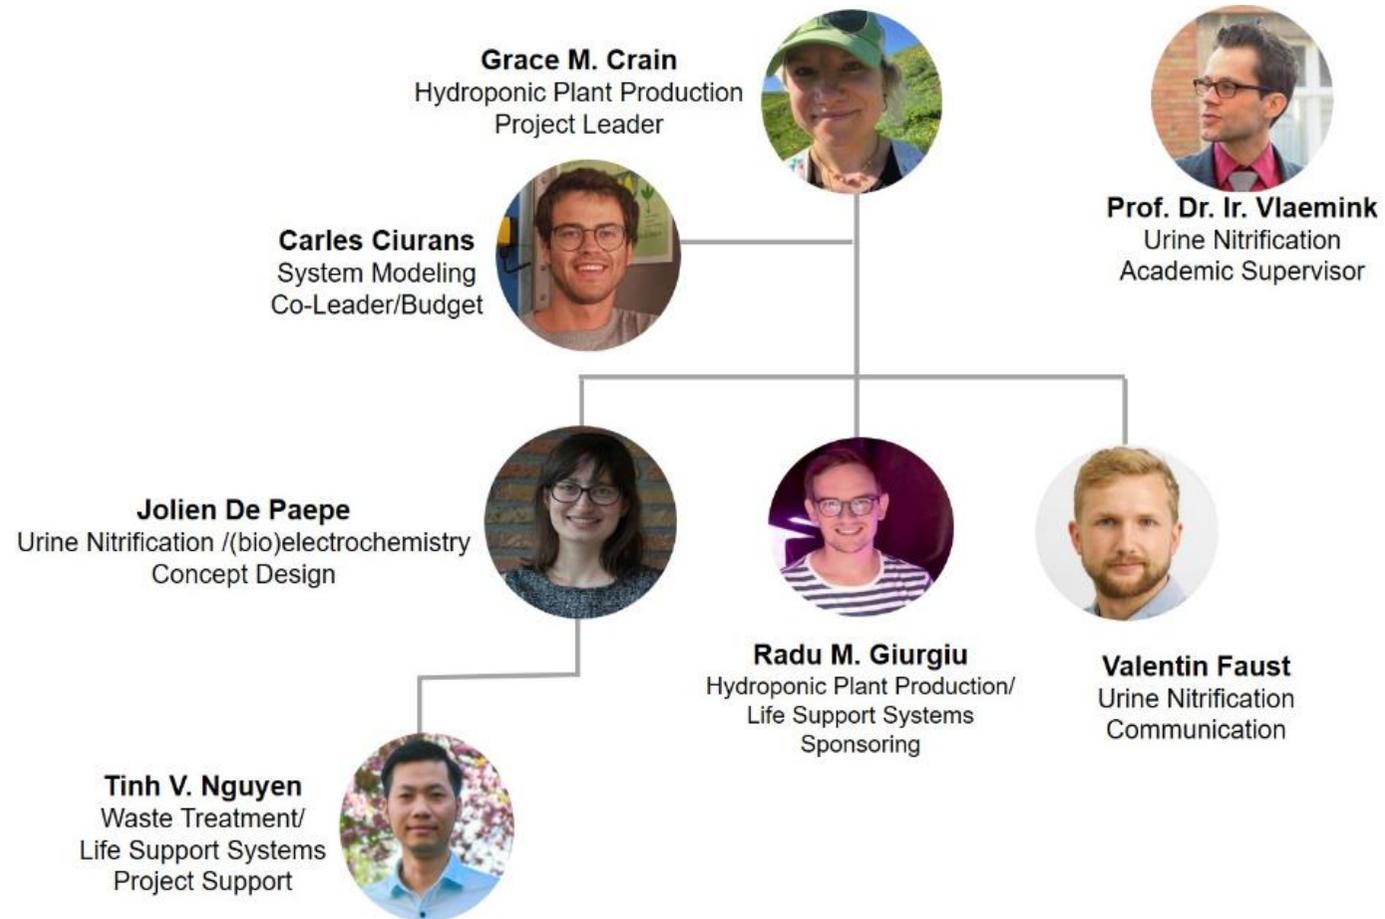

- Based on the ESA\_Lab@ initiative
- Building up on IGLUNA 2019
- Developing bottom-up ideas into technologies with terrestrial applications for space exploration

# Kick-Off Event – Sept. 2019

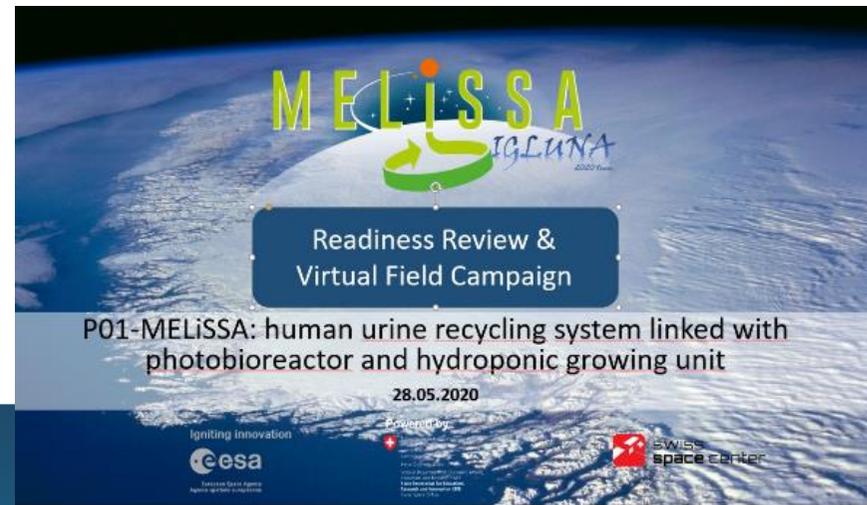

<https://www.youtube.com/watch?v=zFf27vDDpnk>

# Reviews – Nov. 2019 / Feb. 2020 / May 2020

- Based on the European Cooperation for Space Standardization (ECSS)
- To introduce students to systems engineering best practices, but simplified with respect to a formal space project review process
- Preliminary Design Review (PDR)
- Critical Design Review (CDR)
- Readiness Review (RR)

## Mission statement

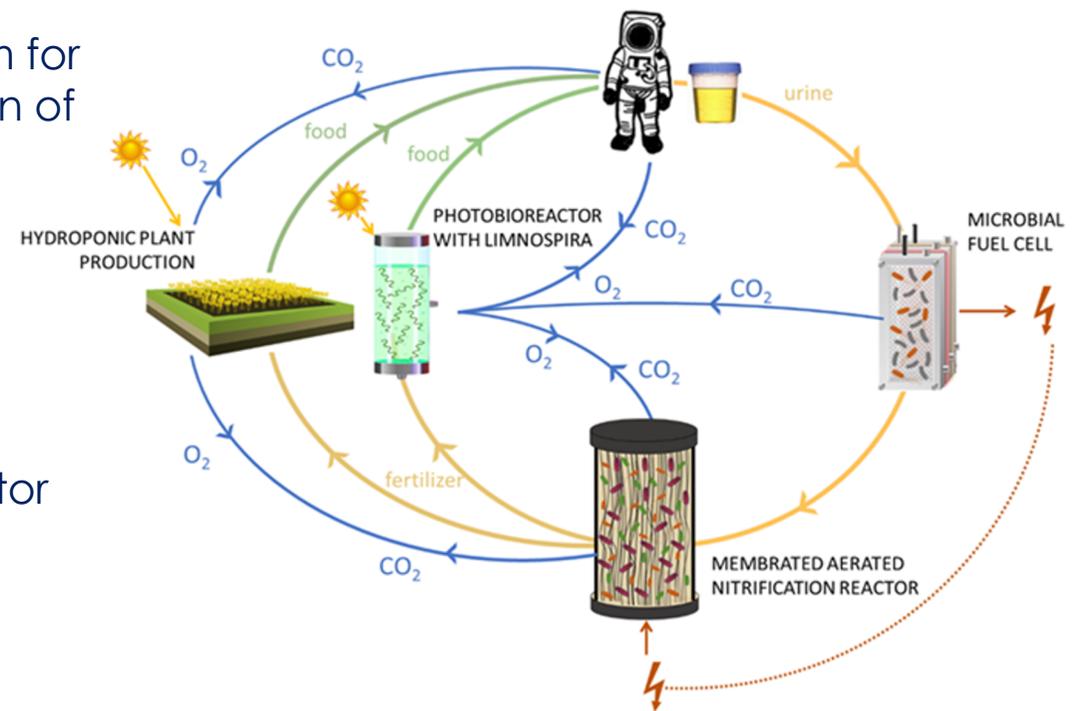

Towards creating a complete recycling system for long-term space missions: Biological conversion of human urine for food and bio-based oxygen production.

## Technology

Bio-based waste conversion:

- Microbial Fuel Cell
- Membrane-aerated nitrification reactor

Photobioreactor  
Hydroponics culture

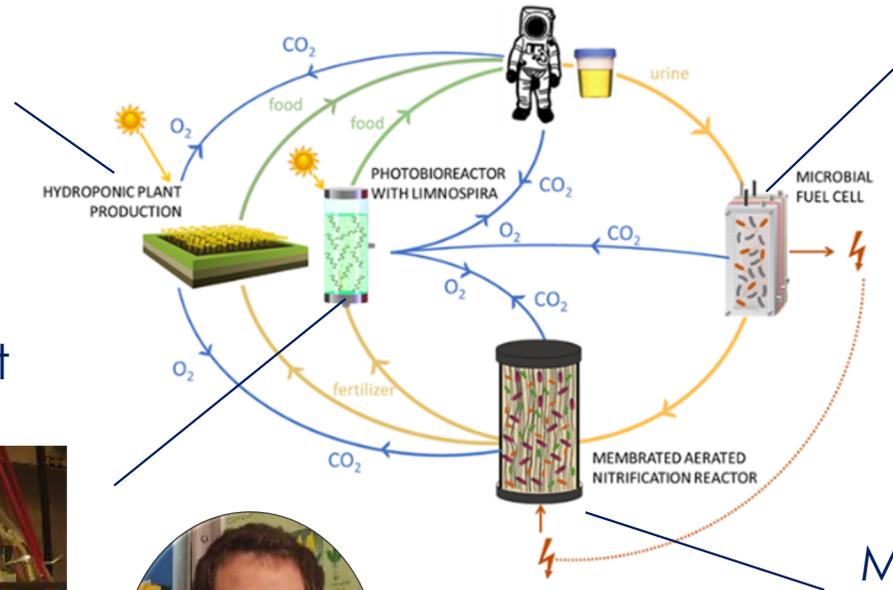

# MELISSA
